⚠ Churn Risk Distribution

Distribution of churn risk levels across customer tiers, highlighting segments with concentrated retention risk.

Tenure Cohort Analysis

How NPS and satisfaction evolve across client tenure bands, identifying potential loyalty fatigue patterns.

Recommended Actions

Data-driven recommendations based on pattern analysis across segmentation data.

NPS Gap in Industry: Energy & Utilities

Energy & Utilities (industry) shows an NPS of -22, which is 14 points below the campaign average of -8. This segment has 45 responses and may require targeted engagement.

Confidence: **Medium** (n=45, 14.0-pt gap, 11% data completeness)

NPS Gap in Industry: Media & Entertainment

Media & Entertainment (industry) shows an NPS of -22, which is 14 points below the campaign average of -8. This segment has 41 responses and may require targeted engagement.

Confidence: **Medium** (n=41, 13.8-pt gap, 10% data completeness)

NPS Gap in Role: Director

Director (role) shows an NPS of -20, which is 12 points below the campaign average of -8. This segment has 95 responses and may require targeted engagement.

Confidence: **Medium** (n=95, 11.8-pt gap, 24% data completeness)

NPS Gap in Region: EMEA

EMEA (region) shows an NPS of -14, which is 6 points below the campaign average of -8. This segment has 123 responses and may require targeted engagement.

Confidence: **Medium** (n=123, 5.6-pt gap, 31% data completeness)

Lowest Sub-Metric: Pricing

Pricing has the lowest rating at 2.6/5.0, which is 0.3 points below the next lowest metric (Support at 2.9/5.0). Consider prioritizing improvements in this area.

> Confidence: **Medium** (n=400, 0.3-pt gap, 100% data completeness)

Methodology: Confidence levels are determined by three factors: sample size, gap magnitude, and data completeness.
• **High:** 20+ responses with large gap (15+ NPS points or 0.5+ rating points) and 80%+ data completeness
• **Medium:** 10+ responses with moderate gap (10+ NPS points or 0.3+ rating points) and 60%+ completeness
• **Low:** Smaller samples, narrower gaps, or lower completeness — pattern noted but warrants further investigation

Recommendations are generated from rule-based pattern detection across segment data. They reflect observed patterns in survey responses, not predictive models.

Survey Type: Classic | **Data Period:** Mar 03, 2025 – May 30, 2025 | **Responses Analyzed:** 400
